Sequence 45, Application US/08442144A

Patent No. 2614583

GENERAL INFORMATION:
APPLICANT: Tai-An Cha
APPLICANT: Eileen Beall
APPLICANT: Bruce Irvine
APPLICANT: Bruce Irvine
APPLICANT: Michael S. Urdea

TITLE OF INVENTION: DIAGNOSTICS AND THERAPEUTICS

NUMBER OF SEQUENCES: 148

CORRESPONDENCE ADDRESS:
ADDRESSEE: Chiron Corporation
ADDRESSEE: Chiron Corporation
           APPLICANT: Michael S. Urdea
TITLE OF INVENTION: HCV GENOMIC SEQUENCES FOR

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      RESULT 156

US-08-441-970-36/c

is Sequence 36, Application US/08441970

is Patent No. 6297370

is GENERAL INFORMATION:

APPLICANT: Tai-An Cha

TITLE OF INVENTION: HCV GENOMIC SEQUENCES FOR

TITLE OF INVENTION: DIAGNOSTICS AND THERAPEUTICS

NUMBER OF SEQUENCES: 147

CORRESPONDENCE ADDRESS:

ADDRESSEE: Wolf, Greenfield & Sacks, P.C.

STREET: 600 Atlantic Avenue

STREET: 600 Atlantic Avenue

CONTY: BOSEON
COMPUTER: IBM compatible
OPERATING SYSTEM: MS-DOS Version 3.3
SOFTWARE: WordPerfect 5.1
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/441,970
FILING DATE: 16-MAY-1995
CLASSIFICATION: 536
PRIOR APPLICATION: 536
PRIOR APPLICATION DATA:
APPLICATION NUMBER: 07/697,326
FILING DATE: 08-MAY-1992
APPLICATION NUMBER: 07/697,326
FILING DATE: 8 May 1991

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              셤
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 25, Application US/08483695

Patent No. 5866139

GENERAL INFORMATION:
APPLICANT: Rremsdorf, Dina
APPLICANT: Porchot, Colette
TITLE OF INVENTION: Nucleotide and Peptide Sequences of a
TITLE OF INVENTION: Applications
NUMBER OF SEQUENCES: 46
CORRESPONDENCE ADDRESS:
ADDRESSEE: Finnegan, Henderson, Farabow, Garrett &
ADDRESSEE: Dunner
STREET: 1300 I Street, N.W.
                 TITLE OF INVENTION: Nucleotide and Peptide Sequences of a
TITLE OF INVENTION: Hepatitis C Virus Isolate, Diagnostic and Therapeutic
TITLE OF INVENTION: Applications
TITLE OF INVENTION: Applications
MUMBER OF SEQUENCES: 46
CORRESPONDENCE ADDRESS:
ADDRESSEE: Finnegan, Henderson, Farabow, Garrett &
ADDRESSEE: Dunner

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   USS-07-965-26/C

Sequence 26, Application US/07965285

Sequence 26, Application US/07965285

PARENT No. 5879904

APPLICANT: Brechot, Christian

APPLICANT: Kremsdorf, Dina

APPLICANT: No. Colette

TITLE OF INVENTION: Hepatitis C Virus Isolate, Diagnostic and Therapeutic

TITLE OF INVENTION: Applications

NUMBER OF SEQUENCES: 46

CORRESPONDENCE ADDRESS:

ADDRESSEE: Finnegan, Henderson, Farabow, Garrett &

ADDRESSEE: Dunner
Patent No. 5879904
GENERAL INFORMATION:
APPLICANT: Aremadorf, Dina
APPLICANT: Kremedorf, Dina
APPLICANT: Kremedorf, Dina
APPLICANT: Porchon, Colette
TITLE OF INVENTION: Nucleotide and Peptide Sequences of a
TITLE OF INVENTION: Applications
VUMBER OF SEQUENCES: 46

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Д
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   à
                                                                                                                                                                    Sequence 26, Application US/08487231

Sequence 26, Application US/08487231

Patent No. 5919454

GENERAL INFORMATION:

APPLICANT: Brechot, Christian

APPLICANT: Porchon, Colette

TITLE OF INVENTION: Nucleotide and Peptide Sequences of a

TITLE OF INVENTION: Hepatitis C Virus Isolate, Diagnostic and Therapeutic

TITLE OF SEQUENCES: 46

CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ö

Sequence 24, Application US/09201912

Sequence 24, Application US/09201912

Patent No. 6210962

APPLICANT: Brechot, Christian
APPLICANT: Brechot, Christian
APPLICANT: Porchon, Colette

TITLE OF INVENTION: Nucleotide and Peptide Sequences of a

TITLE OF INVENTION: Applications

NUMBER OF SEQUENCES: 46

CORRESPONDENCE ADDRESS:

Sequence 126, Application US/08757653

Patent No. 5843669

GENERAL INFORMATION:
APPLICANT: Kaiser, Michael W.
APPLICANT: Lyamichev, Victor I.
APPLICANT: Lyamichev, Natasha
ITILE OF INVENTION: Cleavage Of Nucleic Acid Using
ITILE OF INVENTION: Thermostable FEN-1 Endonucleases
NUMBER OF SEQUENCES: 190

CORRESPONDENCE ADDRESS:
ADDRESSEE: Medlen & Carroll, LLP
STREET: 220 Montgomery Street, Suite 2200

CITY: San Francisco
